

OPSA-150

COD monitoring by UV absorption

Organic Pollutant Monitor

Measurement of Organic Matter at Water Source

Measurement of Organic Matter on the Process Line

Continuous Measurements with Low Maintenance

Large Measurement Range of 0 to 5.0 Abs

ORGANIC POLLUTANT MONITOR OPSA-150

The OPSA-150 is a organic pollutant monitor that uses HORIBA's proprietary Rotary Cell Length Modulation, a measuring technique incorporating 25 years of expertise. The unit can be used as an organic pollutant monitor at drainage systems for determining compliance with COD monitoring regulations, for monitoring quality of water measuring levels of organic matter at water supply intakes, and as an organic monitor on process lines (phenol meter).

*Pole mount, outdoor cover, and analysis panel are available as options.

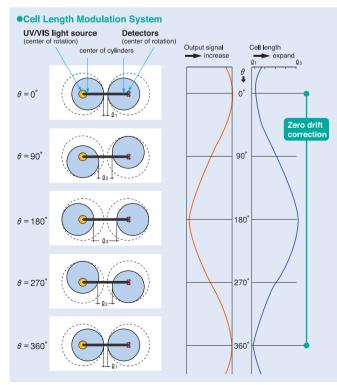

Sensor that makes full use of Rotary full use of Rotary (JAPAN Patent No. 4627022 KOREA Patent No. 10-0840034 CHINA Patent No. ZL200610110930.8)

 Zero drift correction is performed in every cycle of measurement. This correction can eliminate the effect of any interference on cells.

 Cell length modulation provides readings from multiple measurements, making available results from various cell lengths. This allows the single device to make measurements on a large range of concentrations from as low as 0 to 0.1 Abs, up to 0 to 5.0 Abs.

*CompactFlash is a registered trademark or trademark of SanDisc Corporation in the United States and other countries.

Easy-to-use Control Panel

Control of the OPSA-150 is operated via the intuitively designed touch panel. An interactive setup screen eliminates any doubts that a user may have while operating the unit. The Converted COD and TURB Display allow readings to be confirmed on site.

Automatic Data Recording up to One Year

Internal data memory provides data strage for one year in case of one measuring value per hour. A CompactFlash® card can be used to allow easy transfer of data to a PC.

HORIBA's Proprietary Wiper System

The cell is cleaned continuously by the wiper to eliminate any interference in the measurement light path. Therefore, errors in readings from dirty cells, or differences in results before and after cleaning are not evident.

Sample Failure Switch Input

The sample error alarm provided as an option on the previous OPSA-120 is now a standard feature.

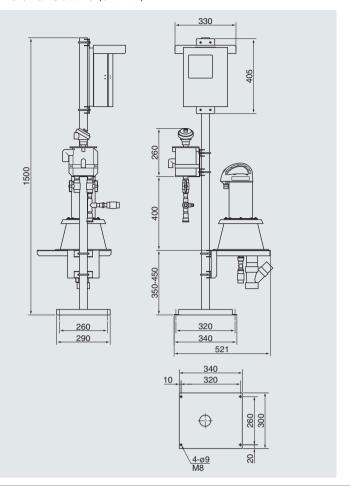

Ten Times Increase in Analysis Sensitivity

The mimimum accuracy of analysis ability has been increased to 0.0001 Abs, a ten-fold increase over the previous OPSA-120 unit. Measurements can be made on concentrations as low as 0 to 0.1Abs.

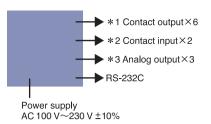

■ Specifications

Name	Organic Pollutant Monitor		
Model name	OPSA-150		
Measurement items	UV absorbance, VIS absorbance, Converted COD level, Converted TURB level		
Principle	2 light path 2 wavelength cell length modulation rotary type		
Measurement wavelength	UV: 253.7 nm, VIS: 546.1 nm		
Construction of analysis section	Flow through type		
Range (Equivalent to	UV absorbance / VIS absorbance		
a cell length of 10 mm)	0 to 0.1 Abs - 0 to 5.0 Abs (Can be set 0.1 Abs increments)		
Resolution	0.0001 Abs (Can be set to 0.001 Abs)		
Repeatability	Within ±2% of full scale (within ±5% if full scale is 2.6 to 5.0 Abs)		
Linearity	Within ±2% of full scale (within ±5% if full scale is 2.6 to 5.0 Abs)		
Stability	Within ±2% of full scale in 24 hours (within ±4% in 24 hours if full scale is 2.6 to 5.0 Abs)		
Response time	T 90 within 1 minute (flow rate of 5 L/min)		
Cleaning method (cleaning cycle)	Automatic cleaning via wipers (continuous cleaning)		
Display methods	LCD display: 320 x 240 monochrome crystal display with backlight (touch panel type) Display details: UV absorbance, VIS absorbance, UV-VIS absorbance (Absorbance can be changed to absorption constant (SAC: m ⁻¹), Converted COD level, Converted turbidity level		
Calibration method	Solution calibration (calibration solution inserted in ampule) via zero solution, span solution (single touch calibration)		
Sample conditions	Temperature: 2 to 40°C* Sample flow rate: Minimum 2 L/min, Maximum 20 L/min *Use a heating device to prevent sample freezing.		
Ambient conditions	Ambient temperature: 0 to 40°C, Ambient humidity: 85% or less		
Analog output	 No. of outputs: 3 outputs (standard) Type: Up to 3 can be chosen from UV absorbance, VIS absorbance, UV-VIS absorbance, Converted COD level, and Converted TURB level outputs Specification: DC 4-20 mA, or DC 0-16 mA, isolated output (no isolation between each channel), maximum resistance load: 600 Ω 		
Alarm and status outputs	No. of outputs: 6 outputs (standard) Type: Up to 4 can be chosen from power failure, maintenance (standard and fixed), batch alarm, COD maximum limit alarm, TURB limit alarm (standard), light source error, sample failure, cleaning motor error, and analyzer error outputs Details: Power failureoccurs when power fails Total alarmcleaning motor error, light source error, analyzer error Maintenanceoccurs when entering maintenance or correction mode, or when the maintenance switch has been turned on Specification: Dry contact output, NO contact Contact rating: AC 125 V 0.3 A, DC 30 V 1 A (with resistance load) Each output has an independent COM interface		
Contact input	No. of inputs: 2 inputs (standard) Type: Sample failure float switch input, time correction input Specifications: No-voltage contact input (can connect to open collector), isolated input On resistance: Maximum 100 Ω, Open voltage: DC 5.5 V, Short circuit current: 10 mA		
Communication	Interface: RS-232C Compatible Communication speed: 19200 bps		
Data memory	Values of measurement items are stored in the main unit's data memory. Data can also be transferred to a CompactFlash®card. Memory interval: 1 minute or 1 hour Memory save time: Every hour* Data memory capacity: 1 minute intervalsfor 10 day's data, 1 hour intervalsfor 1 year's data *The most recent data is saved to memory.		
Light source / Detector	Light source: Low pressure mercury lamp / Detector: Silicon photo cell		
Tubing connections	Sample entry: Rp-1/2 socket Bypass outlet: Rc-1/2 socket Overflow outlet (1): 13 A nominal diameter socket Drain outlet: 50 A nominal diameter socket Overflow outlet (2): 20 A nominal diameter socket		
Construction	For outdoor installation		
Material of parts in contact with sample	SUS、PVC、PP、CR、SiO ₂		
Power source	AC 100 V to AC 230 V ±10%, 50/60 Hz		
Power consumption	AC 100 V to AC 120 V: 45 VA maximum		
Weight	Operating section: Approx. 5.0 kg Analyzer section: Approx. 5.6 kg		
External dimensions	Operating section: 240 (W) x 104 (D) x 320 (H) Analyzer section: 200 (W) x 180 (D) x 403 (H) (units: mm) (excludes protruding sections)		
Color/Finish	Munsell 5PB8/1		
Installation conditions	 Install on a flat stable surface away from sources of vibration and shocks. Ambient air must not contain dust, mist or corrosive gases. Use at atmospheric pressure. Out of direct sunlight. An area with good air circulation. An altitude of less than 2000 m. 		

■ Dimensional Outline (Unit: mm)

■ OPSA-150 Controller (Signals list)

Signal name	Circuit	Standard
* 1 Contact output	0-0 0	Max. switching voltage and current AC 125 V 0.3 A DC 30 V 1 A (Resistance load) No voltage contacts
*2 Contact input	+24 V + ο γ Photocoupler	No voltage contacts Isolated inputs [(-) common] ON resistance Max. 100 Ω Open voltage Max. DC 26 V Short circuit current Max. 13 mA
*3 Analog output	+ 0 — — COM	●DC 4 -20 mA current output ●Isolated output (COM common) ●Load resistance Max. 600 Ω

The HORIBA Group adopts IMS (Integrated Management System) which integrates Quality Management System IS09001, Environmental Management System IS014001, and Occupational Health and Safety Management System OHSAS18001 We have now integrated Business Continuity Management System ISO22301 in order to provide our products and services in a stable manner, even in emergencies,
